SUMMARY

DevOps Engineer dedicated to building reliable, scalable systems using Terraform and Kubernetes. I am resourceful and creative, approaching every problem-solving challenge with a strong technical focus, while open to learning new technologies (including GCP). I am eager to work **cross-functionally** and bring a collaborative spirit and growth mindset to engineering initiatives.

TECHNICAL SKILLS

- **Cloud Technologies:** AWS Cloud (VPC, EC2, ECR, EKS, ALB, etc.), Microsoft Azure (Familiar)
 - **Scripting & Programming Skills:** Bash, Python (Familiar)
 - **Operating System:** Linux (Amazon Linux, Ubuntu)
 - **CI/CD & DevOps Automation:** Terraform, GitHub Actions
 - **Containers & Orchestration:** Docker, Kubernetes (EKS)
 - **Version Control:** Git & GitHub
 - **Monitoring & Security:** CloudWatch, Vulnerability Scanning, IAM, Security Best Practices
 - **Tooling:** AI, Internal documentation, Platform Engineering systems, Systems Engineering
-

PROJECTS

Capstone: Cloud-Native E-Commerce Deployment on AWS | [WebApp](#) | [Infra](#) | [Medium](#) | [LinkedIn](#)

- Achieved **99.9% uptime** and reduced manual deployment effort by **~90%** by engineering a production grade e-commerce platform via **Terraform** automation and deployed using **GitHub Actions CI/CD**.
- Containerized and orchestrated multi-service workloads on **Amazon ECR** and **EKS** with **ALB Ingress Routing** to establish scalable microservices architecture and deploy cloud infrastructure.
- Developed dynamic scaling solutions using **Kubernetes HPA**; monitored system health via CloudWatch Dashboards; assisted in workflow management with JIRA to support operational excellence.

Production-Ready 3-Tier AWS Infrastructure with Terraform & GitHub Actions | [GitHub](#) | [Medium](#)

- Automated end-to-end 3-tier AWS infrastructure deployment using modular Terraform, reducing deployment time by over **~95%** and enhancing operational efficiency and configuration management.
- Integrated **GitHub Actions CI/CD** and **OIDC** to automate deployments, improving **reliability, scalability, and release management**. Developed solutions for cloud operations
- Secured workloads with Secrets Manager, IAM roles, and Bastion host access to strengthen security and accountability.
- Implemented **CloudWatch observability** with metrics for EC2 performance and resource utilization.

Serverless Portfolio | [Link](#) | [GitHub](#) | [LinkedIn](#)

- Deployed React portfolio on **AWS S3 and CloudFront**, demonstrating strong technical knowledge.
 - Implemented **CI/CD using GitHub Actions** to automate deployments and remove manual updates, showcasing proficiency in automation and continuous integration.
-

AWARDS & ACHIEVEMENTS

- **Winner - AWS IAM** – solved real-world cloud computing challenges in a timed environment.
 - **President's Honor List (2024, 2025)** – Academic excellence in Cybersecurity and Cloud Architecture.
-

EDUCATION

Seneca Polytechnic (Also Available for 4-month **optional co-op** in Winter 2026 Term [Jan'26 – Apr'26])

PG Certificates in **Cloud Architecture & Cybersecurity** · Sep 2024 – Dec 2025 · GPA 4.0
