SUMMARY

Highly motivated and **creative Cloud Engineer** with strong **technical expertise** in AWS, Terraform, CI/CD, Docker, Kubernetes, and Linux. Possess strong analytical thinking, excellent communication and collaboration skills, with a commitment to following the latest industry trends in cloud security and DevOps.

TECHNICAL SKILLS

- **Public Cloud:** AWS (VPC, EC2, ECR, EKS, ALB, ASG, RDS, IAM, Lambda, CloudWatch), **Azure** (Familiar)
 - **OS & Scripting:** Linux (Amazon Linux, Ubuntu), Bash
 - **CI/CD & DevOps Automation:** Terraform (Infrastructure as Code), GitHub Actions
 - **Containers & Orchestration:** Docker, Kubernetes
 - **Version Control:** Git & GitHub
 - **Security:** AWS Secrets Manager, IAM
-

PROJECTS

Production-Ready 3-Tier AWS Infrastructure with Terraform & GitHub Actions | [GitHub](#) | [Medium](#)

- Reduced deployment time by over **90%** by **automating** the end-to-end 3-tier AWS infrastructure using modular Terraform and enhancing operational excellence.
- Integrated **GitHub Actions CI/CD** with **OIDC** and Terraform backend to automate and secure deployments, improving reliability, scalability and process automation, supporting GitOps methods.
- Secured workloads with Secrets Manager, IAM roles, and Bastion host access to strengthen security.
- Implemented **CloudWatch observability** with metrics for EC2 performance and resource utilization.

Capstone: Cloud-Native E-Commerce Deployment on AWS | [WebApp](#) | [Infra](#)

- Deploying a production-grade **E-commerce platform** on **AWS** with strong technical expertise in Terraform, EKS, and CI/CD (GitHub Actions), implementing full networking, automation, and security, to meet technical specifications.
- Containerized multi-service app on **AWS** using **Amazon ECR** and **EKS** with **ALB Ingress routing**, ensuring high availability and leveraging **microservices architecture concepts**.
- Added **Kubernetes HPA** for dynamic scaling and CloudWatch Dashboards for centralized observability supporting capacity planning and performance tuning.

Serverless Portfolio | [Link](#) | [GitHub](#) | [LinkedIn](#)

- Deployed React portfolio on **AWS S3** and **CloudFront**, demonstrating strong technical knowledge.
 - Implemented CI/CD using GitHub Actions to automate deployments and remove manual updates, showcasing proficiency in automation.
-

AWARDS & ACHIEVEMENTS

- **Winner – AWS IAM 2025**, AWS Summit – solved real-world cloud challenges in a team competition, demonstrating teamwork and problem-solving skills through collaboration & constructive feedback.
 - **President's Honor List (2024, 2025)** – Academic excellence in Cybersecurity and Cloud Architecture.
-

EDUCATION

Seneca Polytechnic

PG Certificate in **Cloud Architecture & Administration** • May 2025 – Apr 2026 • GPA 4.0 (Semester -1)
PG Certificate in **Cybersecurity & Threat Management** • Sep 2024 – Apr 2025 • GPA 4.0 (High Honors)
