EDUCATION

Seneca Polytechnic

Postgraduate Certificates in Cloud Architecture & Cybersecurity

Sep. 2024 – Apr 2026

4.0 GPA

EXPERIENCE

Information Technology Analyst (Co-op)

Ministry of Health (MPBSDP) | Government of Ontario

Jan. 2026 – Apr.2026

North York

- **Automated** Ubuntu OS provisioning across **21 sites** with a **parallel-safe Ansible playbook** using per-VM OVA templates and cloud-init, cutting provisioning time by **80%**.
- **Authored PowerShell automation** for a **150-machine Citrix VDA upgrade**, contributing to a team effort that reduced a **~187-hour manual process to ~12 hours**.
- **Modernized** the application lifecycle tracker by migrating Excel data to **SharePoint**, building **5 Power BI dashboards**, and automating bi-weekly stakeholder alerting via **Power Automate**.
- **Authored and coordinated 100+ infrastructure CRQs** as Change Coordinator, driving them through **CAB approval, implementation, and closure** in a regulated government cloud environment.

PROJECTS

Cloud-Native E-Commerce Deployment on AWS | [Infra GitHub](#) | [WebApp GitHub](#) | [Medium](#)

- Provisioned multi-environment AWS infra using **modular Terraform** (VPC, EKS, ECR, Secrets Manager) with **S3 remote state** and **DynamoDB locking**.
- Built **GitHub Actions CI/CD** with OIDC auth and environment detection, auto-pushing container images to **ECR** for dev and prod.
- Deployed microservices on **Amazon EKS** with **IRSA** secrets injection, **ALB Ingress routing**, and **HPA** for CPU-based auto-scaling.
- Designed layered **VPC** with public/private subnets across **two AZs**, isolating worker nodes behind **NAT Gateway**.

Production-Ready 3-Tier AWS Infrastructure with Terraform & CI/CD | [GitHub](#) | [Medium](#)

- Built a **modular Terraform** 3-tier architecture (ALB, ASG, RDS MySQL) with **S3 remote state**, **DynamoDB locking**, and **security group chaining** for least-privilege traffic flow.
- Integrated **GitHub Actions CI/CD** with **OIDC** authentication and a **manual approval gate**, running fmt/validate/plan on PRs and gated apply on merge.
- Secured workloads with **Secrets Manager** for runtime credential injection, **IMDSv2** enforcement, scoped **IAM instance profiles**, and **Bastion host** SSH access.

TECHNICAL SKILLS

Cloud Platforms: AWS Cloud, Azure

Scripting & Programming: Bash, PowerShell, Python

Operating Systems: Linux (Amazon Linux, Ubuntu), Windows

CI/CD & DevOps Automation(IaC): Terraform, GitHub Actions, Ansible

Containers & Orchestration: Docker, Kubernetes

Version Control: Git

Security: Encryption, IAM, Secrets Management

IT Operations: Incident & Change Management (SLA tracking), Stakeholder Management

AWARDS & ACHIEVEMENTS

- **Winner - AWS JAM** – solved real-world cloud computing challenges in a timed environment.
- **4x President's Honour List** - Academic excellence in Cloud Architecture and Cybersecurity.
