SUMMARY

Cloud & Site Reliability Engineer skilled in Linux, IaC, and Kubernetes, with **Government of Ontario co-op experience supporting 911 ambulance dispatch infrastructure**. Built a **production-style EKS GitOps platform with zero static credentials**. **Dual AWS JAM podium finisher: 1st place AWS Summit 2025, 2nd place AWS User Group 2026.** Open Work Permit (PGWP), valid to Jun 2029.

WORK EXPERIENCE

Information Technology Analyst, DevOps & Infrastructure (Co-op) Jan. 2026 to Apr. 2026
Ministry of Health (MPBSDP), Government of Ontario North York, ON

- Reduced Linux/Ubuntu OS provisioning time by **80% across 100+ VMs** at **21 sites** by engineering a parallel-safe Ansible playbook with per-VM OVA templates and cloud-init, cutting per-batch runtime from **20 minutes down to 4**.
- Authored PowerShell automation for a **150-machine** Citrix VDA upgrade, compressing a **~190-hour** manual process to **12 hours** of unattended runtime, a **93% reduction** in manual effort and time.
- Automated device and circuit provisioning in **NetBox using Python** to update router records and create switch entries across **production network infrastructure**, with full documentation maintained.
- Coordinated **100+** infrastructure change requests spanning network patching, Windows patching, and data centre maintenance across **21 sites** through CAB approval in the eSMT portal, achieving a **100% approval rate.**

AWS Cloud Deployment Specialist (Part-Time/On-call) Oct. 2024 to Apr. 2026
OutHere Online Mississauga, ON

- Deployed a marketing website on **AWS S3** with **CloudFront CDN** for a digital marketing agency, enabling globally distributed content delivery and reliable hosting.
- Configured custom domain routing via **CNAME records**, connecting the client's domain to CloudFront distribution for a professional and performant web presence.
- Implemented feature updates and enhancements requested by stakeholders, delivering iterative improvements throughout the engagement.

PROJECTS

Fully Automated EKS GitOps Platform - Zero Static Credentials | Infra GitHub | WebApp GitHub | Dev.to Blog

- Hardened **CI/CD supply chain security** by pinning GitHub Actions to **immutable commit SHAs**, enforcing **Trivy container scanning** and **Checkov IaC validation** on every pull request, blocking **CRITICAL severity findings** before image publication to ECR.
- Eliminated **long-lived AWS credentials** across CI/CD and runtime by implementing **GitHub Actions OIDC federation**, per-workload **IRSA scoped roles**, and **External Secrets Operator** syncing secrets dynamically from Secrets Manager.
- Automated full EKS environment standup from **zero to live in under 20 minutes** by engineering a sequenced pipeline covering Terraform provisioning, **Trivy-scanned ECR builds**, **ArgoCD Helm bootstrap**, and deployment validation.
- Resolved **VPC deletion deadlocks** caused by Kubernetes-managed AWS resources outside Terraform state by implementing **ArgoCD cascade deletion finalizers** and layered destroy sequencing, achieving **fully automated environment teardown**.
- Deployed full-stack observability on EKS by provisioning **kube-prometheus-stack**, **Grafana dashboards** via ArgoCD GitOps, and **8 CloudWatch Alarms** with SNS notifications.

TECHNICAL SKILLS

Cloud & DevOps: AWS (EKS, EC2, ECR, VPC, IAM, S3, CloudWatch, SNS, Secrets Manager), Microsoft Azure (coursework), cloud infrastructure, Terraform, ArgoCD, Helm, GitOps

Containers & Networking: Docker, Kubernetes, HPA, TCP/IP, DNS, HTTP, NAT Gateway

Security & Observability: IRSA, External Secrets Operator, IMDSv2, least privilege, encryption at rest and in transit, log analysis, CloudWatch dashboards

Scripting, Version Control & CI/CD: Bash, Python, Linux (Ubuntu, Amazon Linux), Git, GitHub Actions, troubleshooting

EDUCATION

Postgraduate Certificate in Cloud Architecture & Administration, Seneca Polytechnic 2025 to 2026 | 4.0 GPA

Postgraduate Certificate in Cybersecurity & Threat Management, Seneca Polytechnic 2024 to 2025 | 4.0 GPA

Bachelor of Computer Applications, Indraprastha University New Delhi, India 2020 to 2023 | 3.8 GPA

CERTIFICATIONS, ACHIEVEMENTS & VOLUNTEERING

- **AWS Certified Solutions Architect Associate** (SAA-C03), 2026
- **AWS JAM**: **1st Place** AWS Summit 2025, **2nd Place** AWS User Group 2026 (AWS-hosted hands-on cloud competitions including AI services like Amazon Bedrock)
- **Featured in Terraform Weekly Newsletter** (Issue #280): "From Terraform Spaghetti to a Production-Grade GitOps Platform"
- **4x President's Honour List**, 4.0 GPA across all semesters
- **Volunteer, AWS Community Day & Cloud Summit Toronto** (2026): Supported event booth coverage, sponsor area, and hackathon logistics.
