SUMMARY

Cloud/DevOps Engineer with hands-on experience in AWS, Terraform, CI/CD, Docker, and Bash. Strong academic foundation (GPA 4.0) with a security-first mindset and eagerness to expand into Azure, GCP, and Kubernetes.

TECHNICAL SKILLS

- **Cloud:** Hands-on with **AWS** (VPC, EC2, ALB, ASG, RDS, S3, IAM, Lambda, CloudWatch)
 - **OS: Linux** (Amazon Linux, Ubuntu).
 - **IaC:** Automated infra with **Terraform (modular, remote state)** and **GitHub Actions** pipelines.
 - **Containers & Orchestration:** Experience with **Docker; Kubernetes** (basic)
 - **Version Control:** Git & GitHub
 - **Scripting:** Bash
-

PROJECTS

Production-Ready 3-Tier AWS Infrastructure with Terraform & GitHub Actions | [GitHub](#) | [Medium](#)

- Cut deployment time by **90-95%** by automating end-to-end 3-tier AWS stack (VPC, ALB, ASG, RDS, IAM, Bastion) with modular Terraform.
- Streamlined operations via **remote Terraform backend, state locking** (S3 + DynamoDB) and **GitHub Actions CI/CD** with OIDC.
- Secured workloads using **AWS Secrets Manager**, IAM least-privilege roles, and Bastion host-based access.
- Ensured high availability with **Auto Scaling, ALB health checks, and CloudWatch**.

Serverless Data Scraping & Notification Pipeline on AWS | [GitHub](#) | [LinkedIn](#)

- Automated data collection by building a serverless pipeline with EventBridge → Lambda (Python/BeautifulSoup) → S3.
- Reduced **manual monitoring overhead** with SNS alerts and CloudWatch logs/metrics.
- Increased **system reliability** using least-privilege IAM, error handling, and retry logic.

Serverless Portfolio | [Link](#) | [GitHub](#) | [LinkedIn](#)

- Deployed React portfolio on AWS S3, served via **CloudFront**, with custom domain from Namecheap.
 - Implemented **CI/CD** using **GitHub Actions** to automate deployments and remove manual updates.
 - Secured EmailJS integration by injecting credentials through GitHub Actions secrets.
-

AWARDS & ACHIEVEMENTS

- **Winner – AWS IAM (Team Competition), AWS Summit 2025** – solved real-world cloud challenges in a team-based competition. | [Link](#)
 - **President's Honor List, 2024 & 2025** – awarded for academic excellence in Cybersecurity (2024) and Cloud Architecture (2025). | [Link](#)
-

EDUCATION

Seneca College of Applied Sciences & Engineering Technology

PG Certificate in **Cloud Architecture & Administration** · May 2025 – Apr 2026 · GPA 4.0

PG Certificate in **Cybersecurity & Threat Management** · Sep 2024 – Apr 2025 · GPA 4.0 (High Honors)
